

Vibration constructive bioresonance frequencies.

A well-known fact in science: both the body as a whole and each organ separately generate an energetically electromagnetic signal that has its own specific vibration frequency.

In the state of biophysical homeostasis, when an individual is emotionally balanced, healthy, all their organs work in a synchronized and balanced way, they radiate an energy range of a harmonious frequency range, similar to the coherence of a symphonic orchestra.

Due to various reasons, including stressful situations, there is a violation of the energy balance, a failure of the frequency range vibration, organ dysfunction that is beyond the control of the mind appears “out of nowhere”, and this entails a complex destructive resonance, manifested in the form of diseases - diseases of the body.

The patented Immanent Therapy [®] **Program / Delaying of the aging processes of the human body**, one of the algorithms of which is the use of photobiomodulation-linguistic wave commands - impulses to transmit important immunomodulatory frequencies to the body, successfully restores the functioning of an organ dysfunctional, contributes to the full functioning of the genotype, delaying the aging process.

This healing interpretation algorithm has the following advantages over allopathic therapy:

- Guaranteed complete recovery of the lost mental and physiological state of the biosystem.
- Complete renewal of the genotype, without medication.
- No side effects on the body compared to drug treatment.
- No possibility of overdose.
- The likelihood of using therapy without age restrictions.
- Ability to use technology at a time convenient for the patient.
- Health promotion and disease prevention.
- Technology is based on scientific evidence.
- Takes into account all health and wellness factors.
- Takes patients' wishes into account.
