

## Self-regenerative biological system.

**Brief report on the effectiveness of the algorithms of the patented Imanente Therapy<sup>®</sup> Program / Delaying the aging process of the human body.**

*Being depends more on probability  
than the regularity*

1. Macrophages are [activated](#), which implies self-tuning of the phagocytic process.

**OMARIDIN<sup>™</sup>** product formula They manage to "cultivate" a properly balanced intestinal microflora, which controls the qualitative state of the immune system.

**OMARIDIN<sup>™</sup>** product formula provide an antagonistic effect of lactobacilli against pathogenic microorganisms and a mild antibiotic effect.

4. Single-source amino acid complex makes positive and irreversible adjustments in the body.

5. The car's holographic audio matrix **OMARIDIN<sup>™</sup>** gives the same positive result as a physical product.

6. Complex of sound and linguistic waves of specially developed algorithms - for each patient individually - eliminates hormonal imbalance, violations of the harmony of the peripheral nervous system (proven by Certificate PD 1/0413).

7. Concentrated beams of light of a certain spectrum of radiation are bactericidal, they stimulate the regeneration of body tissues ( [Niels Ryberg Finsen](#), [Nobel Prize](#) in Medicine and Physiology in 1903).

The **patented Imanente Therapy<sup>®</sup> / Delaying of the aging process of the human body program** includes [photobiomodulation](#) in the body harmonization complex (developed by Niels Ryberg Finsen, laureate of the [Award Nobel](#) - transfer of electrons through the photosynthetic chain to the human epithelium, with its consequent [positive effect](#) on synaptic terminations, including in oncology).

*All energy in the Universe is neutral,  
eternal, exists beyond dimensions*

8. A beam of light ( laser biostimulation ) of a certain frequency of the radiation spectrum (no need to go into detail about the principle of photobiomodulation therapy) transmits electrons through the photosynthetic chain to the human epithelium. There is a transformation of ATP (adenosine triphosphate) and NADPH (nicotinamide adenine dinucleotide phosphate) which, in turn, causes the organism to activate the emanation-material exchange, stimulating redox reactions in living cells, including immunomodulation.
9. The energetic activity that accumulates as a result of the absorption of light quanta is later used to form oxygen, this contributes to the healing of the cell and therefore of the whole organism in general (Otto Warburg, Nobel Prize in 1931 for research in oxygen deficiency during cellular respiration).
10. According to an international multidisciplinary team of clinicians and researchers, photobiomodulation therapy is safe and effective, including in oncology. In 2015, the World Association for Laser Therapy (WALT) defined photobiomodulation therapy as a form of light therapy.
11. I'm using photobiomodulation therapy in practice successfully for over 20 years. In December 2000, NASA stated that mitochondrial cytochrome c oxidase absorbs light in a specific wavelength spectrum. Adenosine triphosphate is synthesized, which is a source of energy and provides the necessary vital activity of the body. The origin of various biochemical reactions has also been proven, as a result of which glucose, sugar, starch, etc. are produced from carbon dioxide. **Hence the scientific explanation of food prana .**
12. The **patented Immanent Therapy**® / **Delaying of the human body's aging process** helps to eliminate the lack of cellular oxygen.
13. Biochemical control of apoptotic changes is initiated, the body's aging process slows down.

14. The **patented Program Immanent Therapy**® / **Delaying the aging process of the human body** is directly related to the [Nobel Prize](#) of Physiology or Medicine 2017 (discovery of the molecular mechanisms that control the [circadian rhythm](#)).

Biological or circadian cycles control many biogenic events. Violation of these natural rhythms is associated with many diseases, such as sleep destruction, metabolic syndrome, and neoplasm growth.

Therefore, by being able to prevent and eliminate certain components of circadian rotations, a platform for the therapeutic elimination of diseases associated with these (circadian) dysfunctions of the body is guaranteed.

The **patented Immanent Therapy**® / **Delaying of the aging process of the human body program**, controlling temporal fractal [bioprocesses](#), [directly influencing the genetic structure](#), [is capable of controlling the duration of the biological cycles of the somatic system](#).

And that means power over premature aging processes.

Applying in practice a technological complex of discoveries by Nobel Prize winners, namely:

1. [Niels Ryberg Finsen](#) (Nobel Prize in Medicine and Physiology in 1903);
2. [Ilya Mechnikov](#) (Nobel Prize in Physiology or Medicine in 1908);
3. [Otto Warburg](#) (Nobel Prize in 1931 for research on oxygen deficiency in cellular respiration);
4. [Jeffrey C. Hall](#), Michael Rosbash and Michael W. Young (Nobel Prize in Physiology or Medicine in 2017 for discovering the molecular mechanisms that control the circadian rhythm).

Like other scientist-discoverers and also countless personal developments (including those patented by me), I confidently declare: **The Program for delaying the aging process of the human body, based on the Immanent Therapy**® technology ( *patented discovery by [#Volodymyr Naumenko](#)*, using exclusively products of natural plant origin, is the most effective, as long as

the patient meets all the requirements I set out at the beginning of the recovery course.

I hope I have convincingly proven the effectiveness of the patented Immanent Therapy <sup>®</sup> **Program / Delaying the aging process of the human body.**

Sincerely, Dr. Volodymyr Naumenko.

Thank you for your attention.
